

OPEN TRADING NETWORK

**COMMUNITY PROPOSAL
FOR FUTURE
OTN DEVELOPMENT**

PROJECT: OTN 2.0

PROJECT OVERVIEW

Project Name – OTN 2.0

Voting Address – *lampochka4otn*

Team – *Superteam;*

Brief Description of the Development Plan – *to find a real-life appliance of cryptocurrency through cooperation with start-ups and to help all people, which hold crypto for a long time and do not know where to spend it;*

Budget – \$756,000

INTRODUCTION TO THE IDEA

Advantages of the OTN project:

- global cross-chain ecosystem;
- lead tokenization tool;
- having a strong partner;
- existing community;
- there is already a practical application - payment of the commission for buying crypto currency;
- listing on the exchanges;
- full legality of transactions.

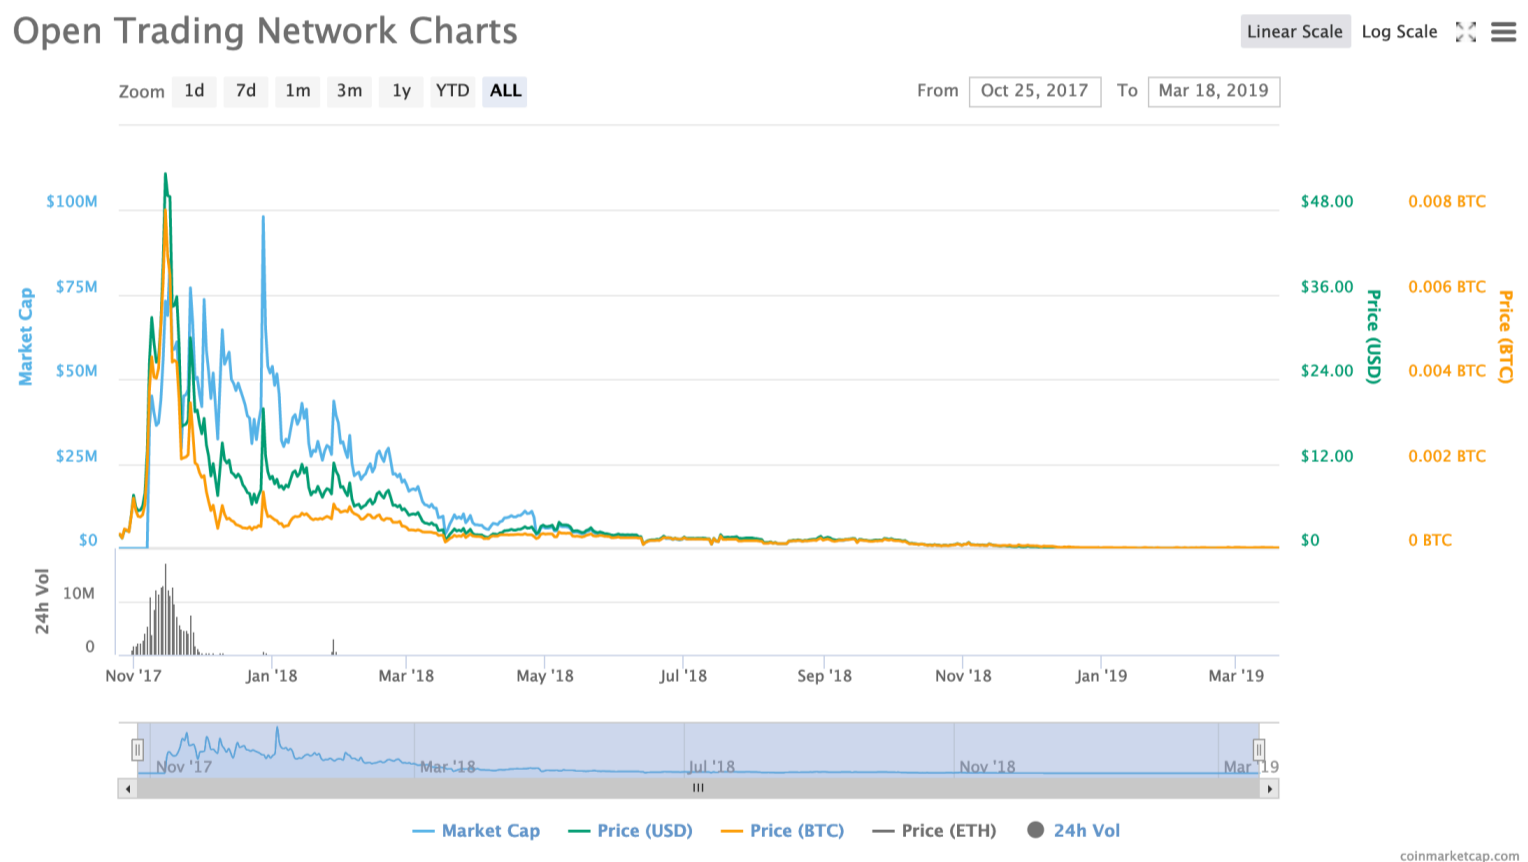

The idea: to find a real-life appliance of cryptocurrency through cooperation with start-ups and to help all people, which hold crypto for a long time and do not know where to spend it.

- promote cryptocurrency as a new and promising;
- collaboration with games;
- cooperation with brokers;

- technical product development;
- spread of tokenization;
- completion of the altcoin storage;
- attracting customers through the OTN network.

MARKET ANALYSIS

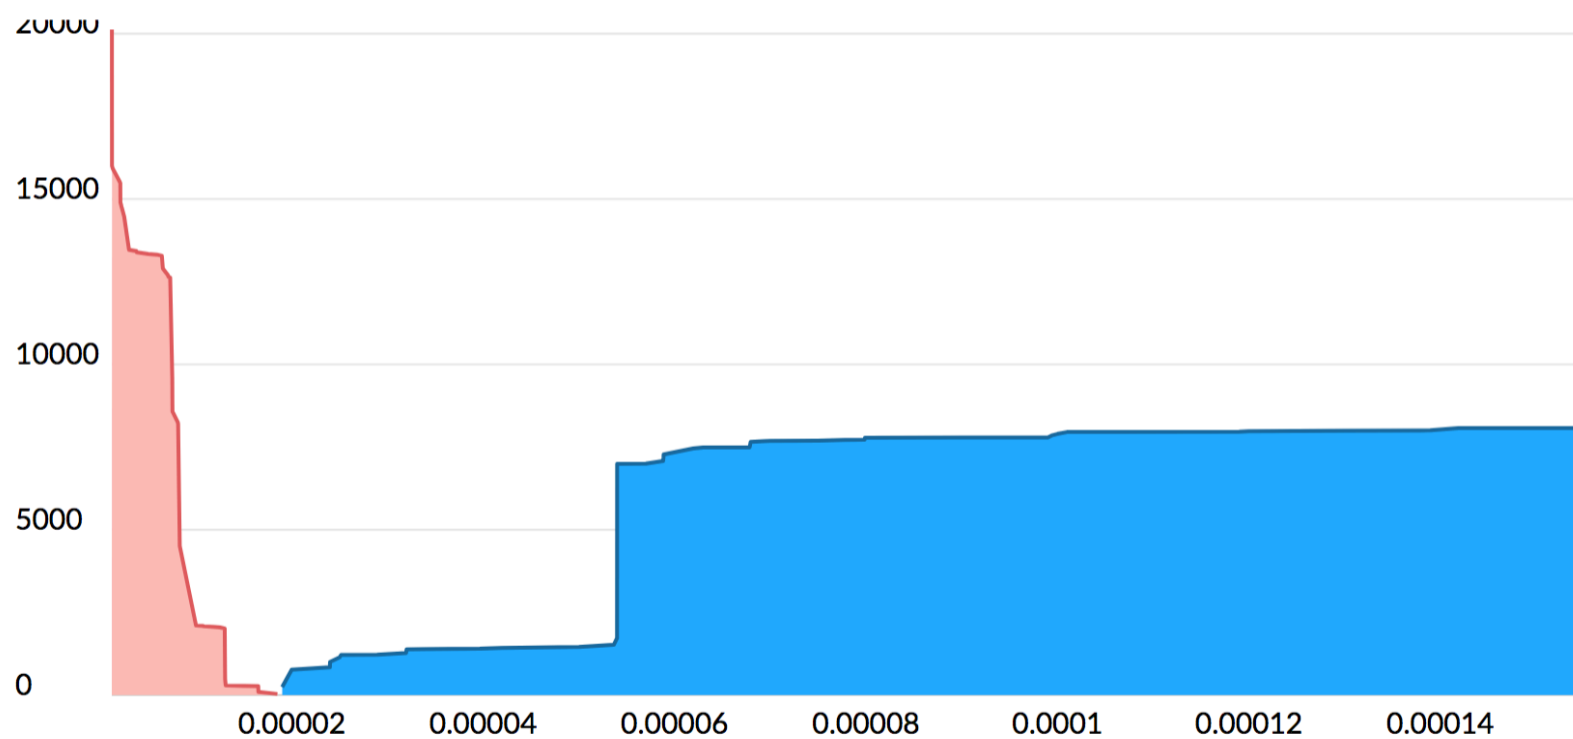

Crypto Hype is now asleep, the volatility of crypto currencies remains only on major currencies. These are huge opportunities for the development of a crypto currency already known, not new, but promising. At the moment, the market capitalization is about 9 million rubles, daily trading volumes fluctuate strongly.

It certainly doesn't compare with what it was a year ago. But small turns easier to manage.

Over the past two months, even such a small activity has been carried out on the market. As you can see the price is rising again!

MONETIZATION STRATEGY

The business model is to sign contracts with cryptocurrency sales counter parties. Including taking commissions from transfers at a later time.

Interaction:

- make deals within the network
- make insurance transactions
- pay for commission and goods
- payment for participation in various events

ROADMAP

1. April 2019 - writing a detailed development strategy;
2. May 2019 - investment attraction for initial investment;
3. June 2019 - August 2019 - development search;
4. August 2019 - December 2019 - signing of contracts for cryptocurrency sales;
5. December 2019 - May 2020 - Altcoin storage development.
